

This collection highlights some of my favorite artwork created over time as I explored different styles and techniques. Art has always been a space for experimentation and self expression for me since I was VERY little. I enjoy moving between styles rather than staying in one lane (because it gets a little boring sometimes).

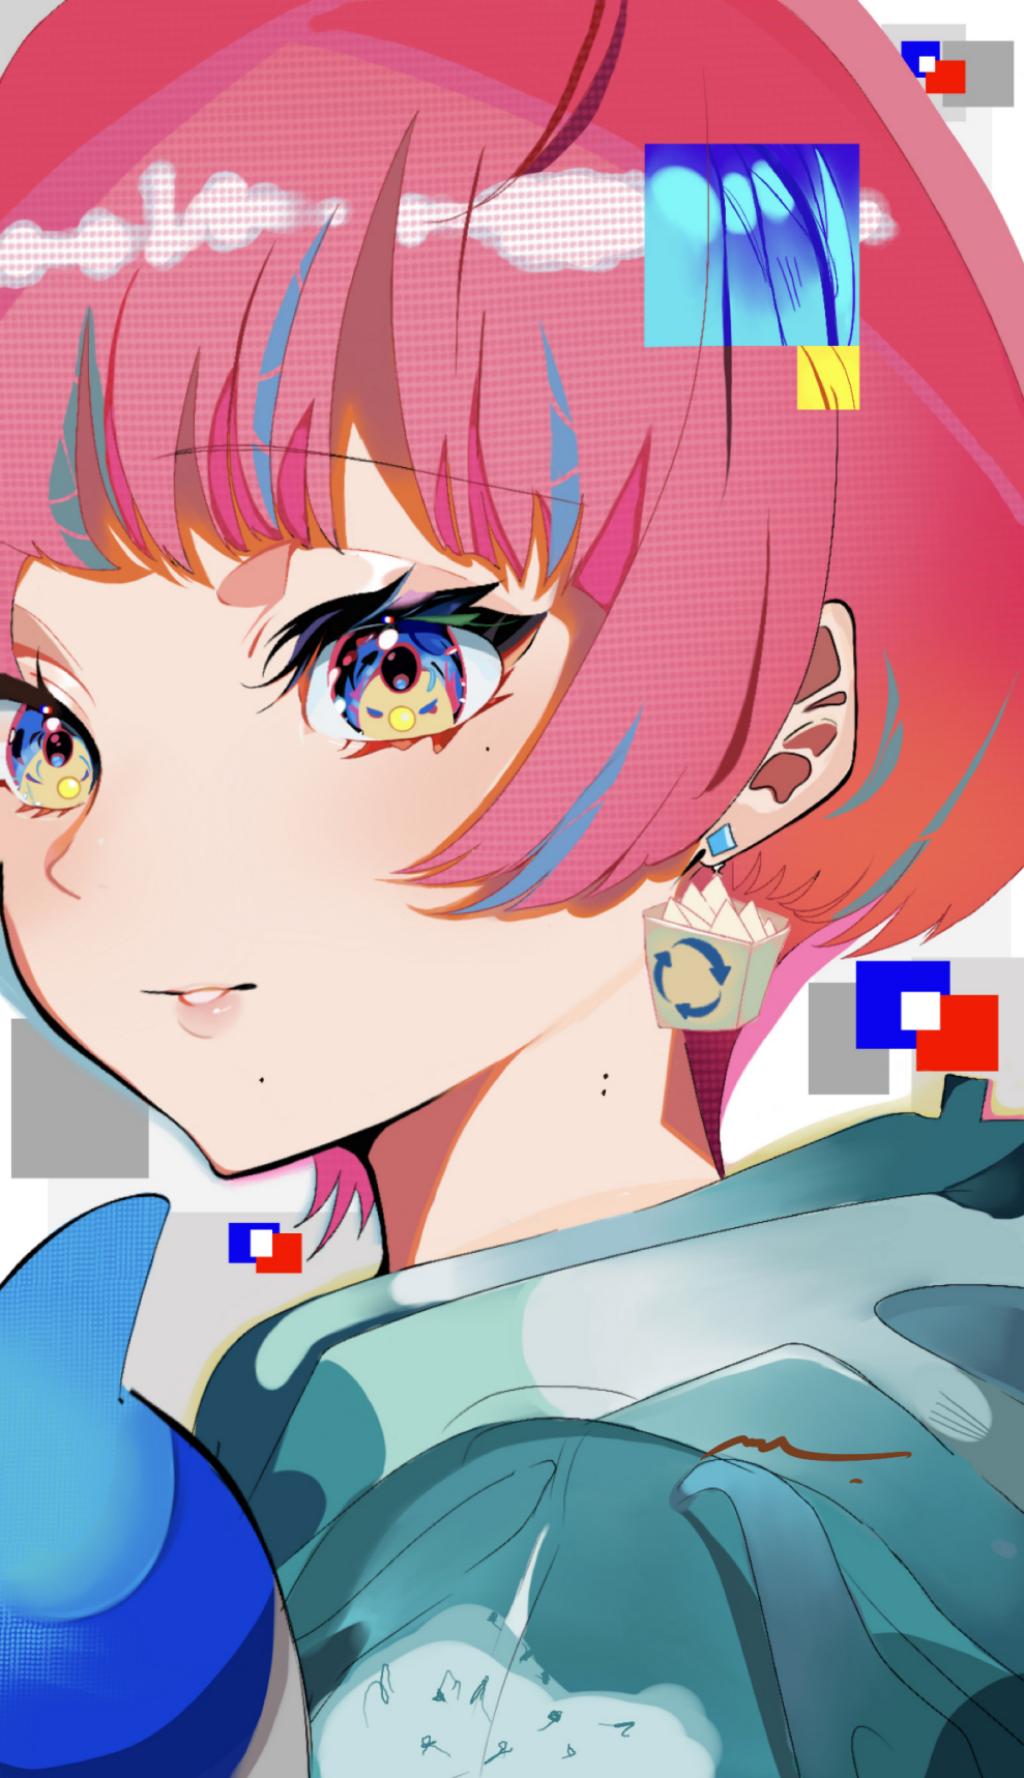

This humble collection represents that journey and the joy I find in exploring visual storytelling through different artistic approaches.

P.S: The final piece in this collection is a logo design created for the Muslim Girls Youth Group at the Eastern Twin Cities Islamic Center (<https://www.instagram.com/etcicgirlsyg/>). Designing this logo was especially meaningful to me, as I was a board member and loved what I was doing.

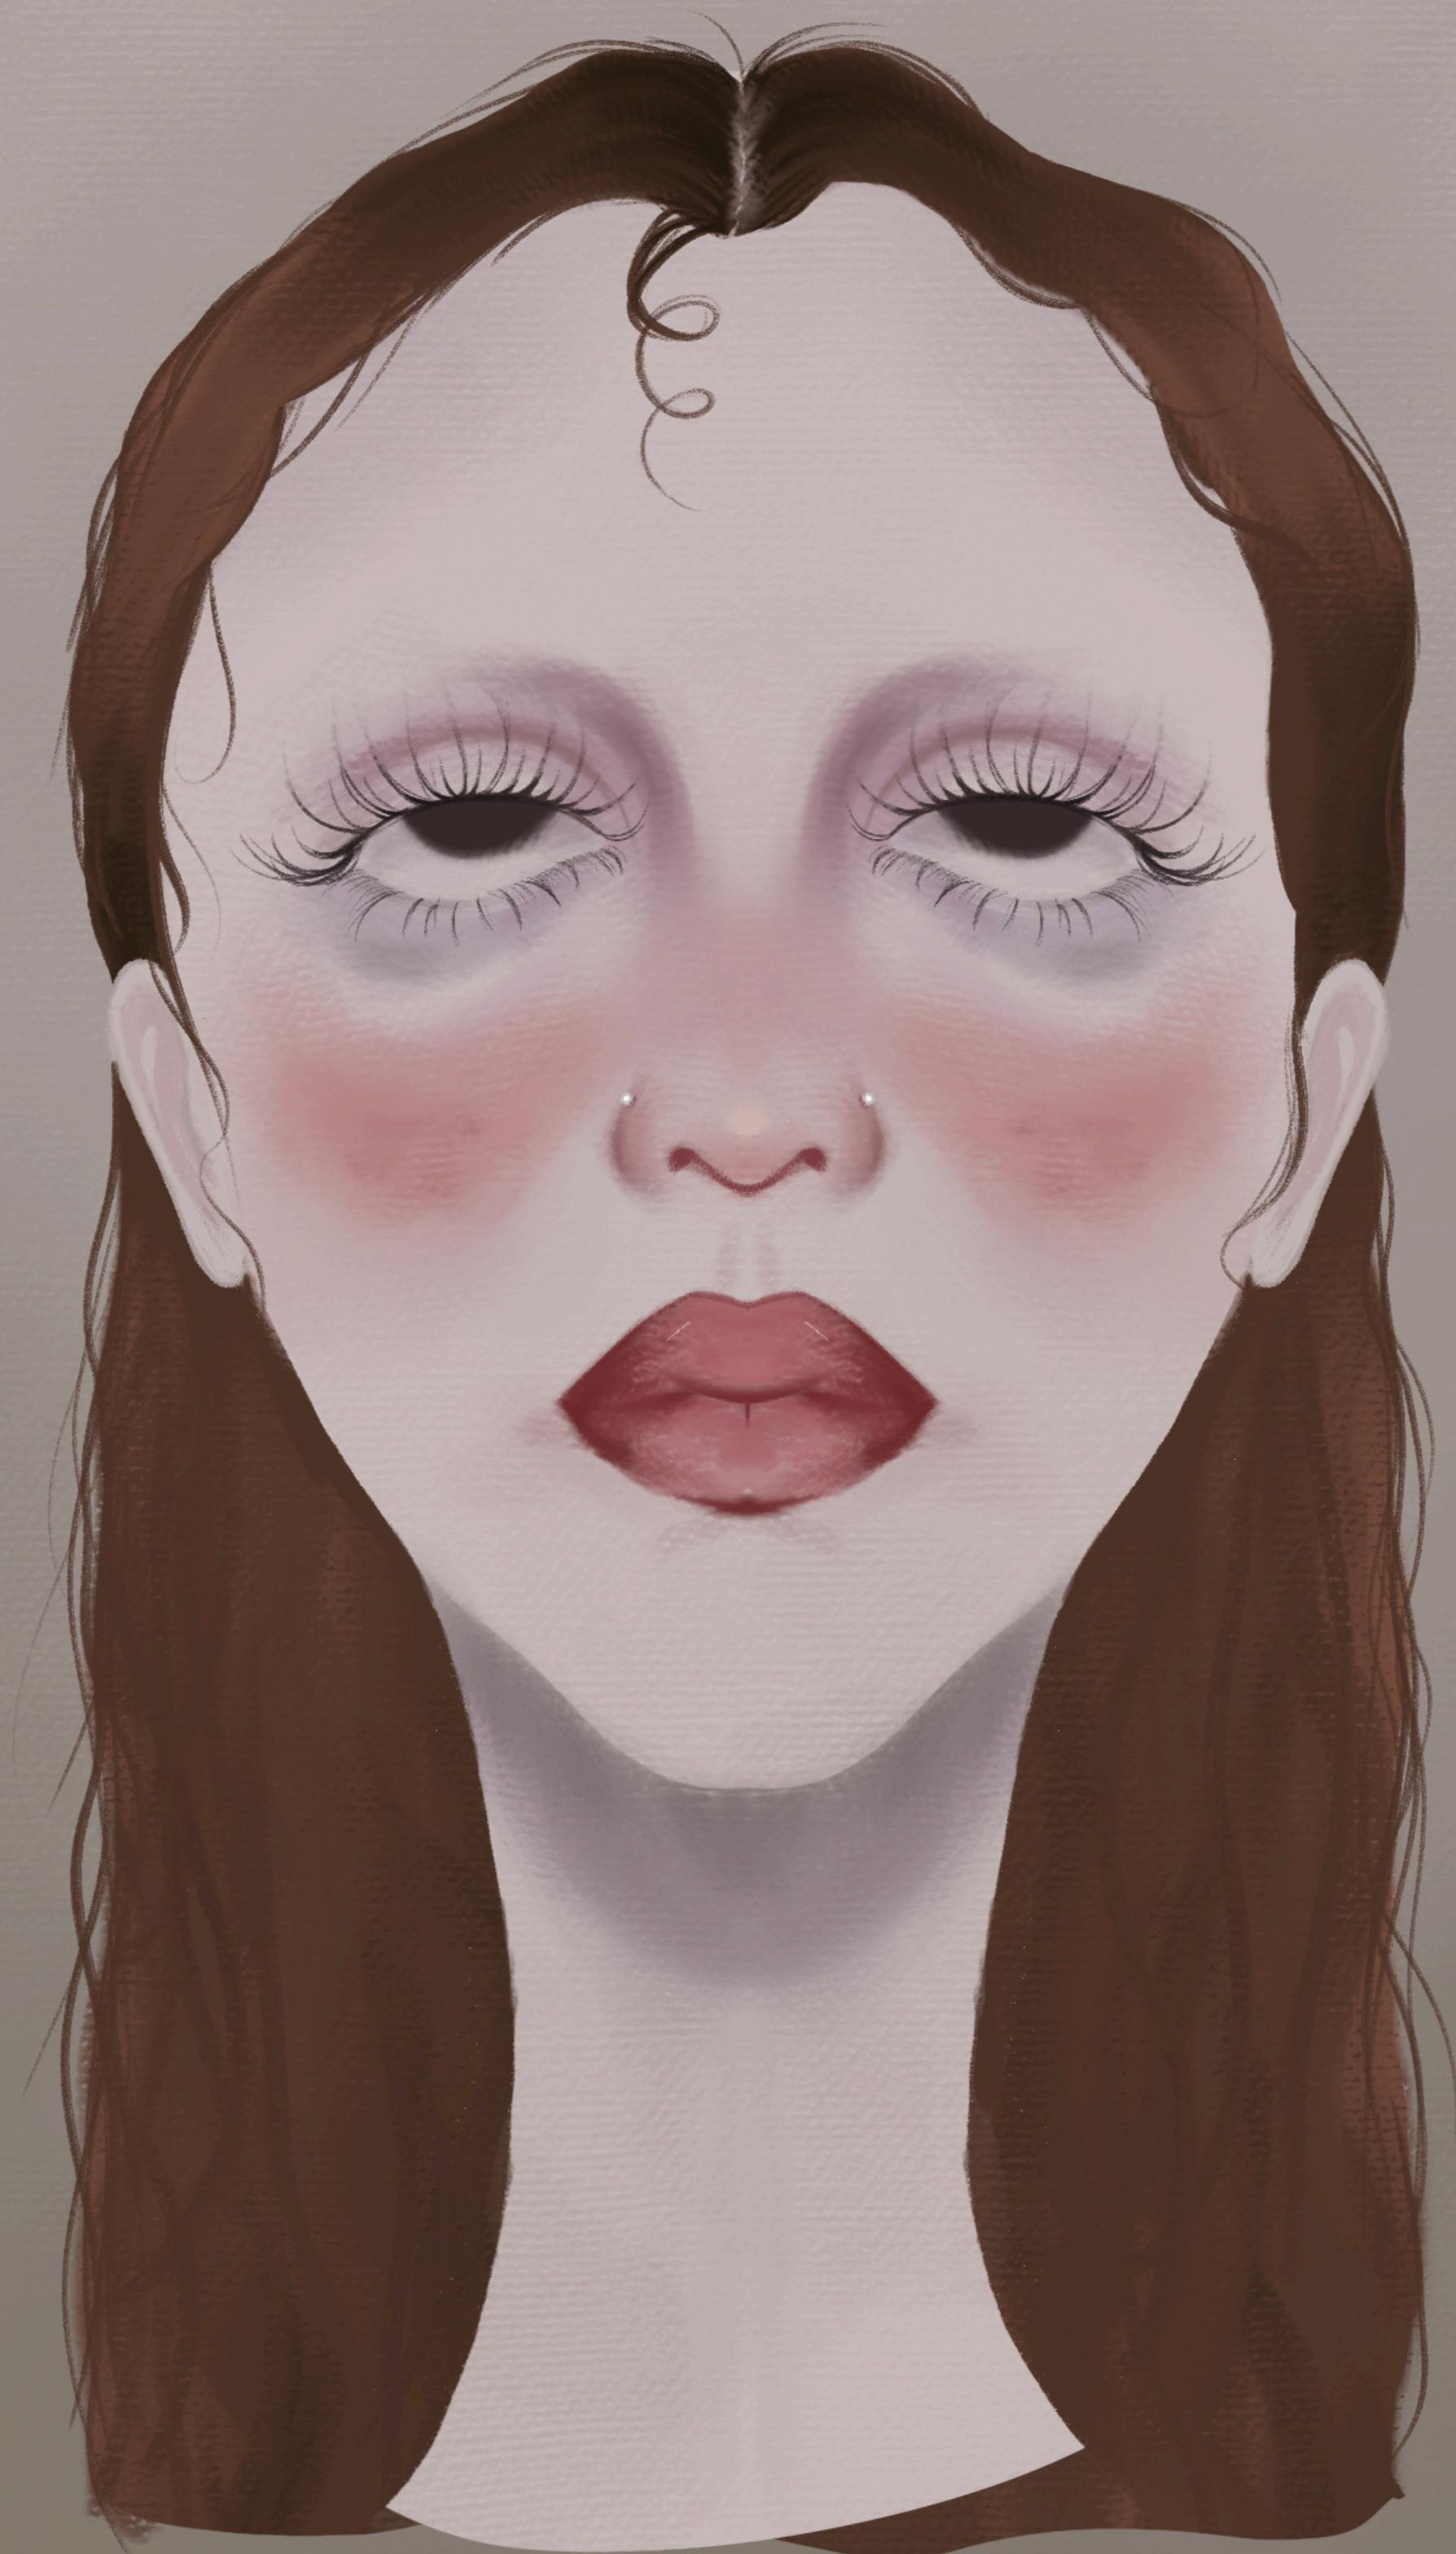

Enjoy!
